DETAILED ACTION

Response to Amendment

1. This action is in response to the provisional election mailed July 29, 2005. Applicant elected group II, claims 22-31. The restriction requirement made on June 24, 2005 is withdrawn in favor of a new restriction requirement placing claims 30-31 in Group III as being drawn to a method for patterning an air-bearing surface of a slider. Claims 1-31 are pending in this case.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a slider assembly, classified in class 428, subclass 41.9.
 - II. Claims 22-29, drawn to method of producing a slider assembly, classified in class 156, subclass 297.
 - III. Claims 30-31, drawn to a method for patterning an air-bearing surface of a slider, classified in class 216, subclass 33
3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process

(MPEP § 806.05(f)). In the instant case, the product can be made by producing a slider assembly comprising arranging a plurality of extruded sliders each having an surface that are coplanar to one another.

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by producing an air bearing surface of a slider comprising applying a resist layer on an air-bearing surface of an extruded slider.

Inventions II and III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)).

The inventions II and III are distinct, each from the other because: a method for patterning an air-bearing surface of a slider is not the same as a method for forming a slider assembly. In the method for patterning an air-bearing surface of a slider, the slider is already formed.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Louis Wu on 5/27/2005, to request an oral election to the above restriction requirement, but did not result in an election being made.
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence Ferguson whose telephone number is 571-272-1522. The examiner can normally be reached on Monday through Friday 9:00 AM – 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye, can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
